

Esas Holding Deployed Surgate for its E-Mail Security

Success Story

Sector :

Food

Surgate Solution:

E5000

Surgate Protected:

Since February 2009

«Profile management allows us to define super-user for our each sub-company. Super-users can customize settings for their personalized needs. Moreover they can see their own traffic reports without interrupting system administrator. These are just three of many useful features. After having unsuccessful experiences with a global vendor Surgate suprisingly succeed. For this reason we strongly recommend Surgate for e-mail security.»

Gokhan Abitagoglu

Network Manager, Esas Holding

«Surgate's high spam catch rate and plug&play and forget philosophy is really very impressive.»

«As a result of problems we had with a well-known global vendor, we start searching for a new solution. We convinced to test Surgate since it provides e-mail archiving feature and promise about providing high success more than % 99 rate. Surgate showed us that we made a right choice. It is working without any problem for more than 13 months.»

«Once Surgate has been installed, we did not get any problem in our services.»

Gokhan Abitagoglu

Network Manager, Esas Holding

«Since Esas Holding was using a global vendor, this was an advantage and also disadvantage at the same time for us. Our customer was conscious and had high expectations from us. We are happy to meet our customer's expectations and to provide a satisfying solution.»

İzzet Altunal

Sales Manager, Endersys
